## Coffee

This problem gives you the chance to:

• use a chart to solve simultaneous equations

This chart shows the cost, in cents. of different numbers of small and large cups of coffee.

- $1. \ Explain \ what \ the \ number \ 500 \ in \ the \ chart \ means.$
- 2. Use the information in the chart to find the cost of a small cup of coffee and the cost of a large cup of coffee. Show how you figured it out.

Small cup of coffee costs \_\_\_\_\_ cents Large cup of coffee costs \_\_\_\_\_ cents

What number should go in the empty box that the arrow is pointing to. Explain your work.	
Emplain your work.
